Aircraft for experienced flyers

We stock a large number of aircraft of all types, the selection shown here are simply the most popular ones. These aircraft are either ready, or almost ready to fly. However none of them except the two electric gliders are beginner's aircraft and even those should be flown with an instructor at first.

PHASE 3 F-16

The Phase 3 F-16 is a near scale model of the famous American jet fighter. It uses a brushless motor driving a ducted fan for propulsion giving both a high top speed and a realistic jet noise. Of foam construction, it is quite easy to build and fully aerobatic.

Our deal price includes a Spektrum DX6i R/C system as this has the mixing functions needed for this aircraft built in.

PHASE 3 F-16 PACKAGE DEAL	
Phase 3 F-16 kit inc fan unit, brushless motor and controller	£97.50
Spektrum DX6i R/C combo	£139.99
Two L9MM micro servos	£10.00
11.1V 2200 mA lipo battery	£19.99
Charger	£29.99
Total:	£297.47

PARKZONE HABU

The Parkzone Habu uses a brushless motor driving a ducted fan for propulsion giving both a high top speed and a realistic jet noise. Of foam construction, it is very easy to build. The undercarriage can be left off if required and the aircraft landed on its belly. The Habu has an excellent power to weight ratio and is fully aerobatic.

Our deal price includes a Spektrum DX6i transmitter, the rest of the radio control system is included with the aircraft.

PARKZONE HABU PACKAGE DEAL	
Parkzone Habu BnF inc fan unit, brushless motor and controller	£159.99
Spektrum DX6i R/C transmitter	£99.99
Total:	£259.98

ST MODELS MX2

The ST Models MX2 is a highly aerobatic aircraft made from tough EPO foam. Its very powerful brushless motor gives it vertical performance and its large control surfaces allow 3D maneuvers.

Running time of the battery is around 10 minutes

This aircraft comes almost ready built.

ST MODELS MX2 PACKAGE DEAL	
ST Models MX2 inc brushless motor and controller	£109.99
Futaba 6J radio control	£134.99
11.1V 2200mA lipo battery	£20.99
Charger	£29.99
Total:	£295.96

WOT 4 FOAM E Mk2

The WOT4 is an aerobatic aircraft made from tough EPO foam. Its powerful brushless motor gives it excellent maneuverability, but it is still quite easy to fly for an experienced pilot.

Running time of the battery is around 10 minutes

This aircraft comes almost ready built.

WOT 4 MK2 PACKAGE DEAL	
Wot 4 Mk 2 foam inc brushless motor and controller	£117.99
Futaba 6J radio control	£134.99
11.1V 2200mA lipo battery	£20.99
Charger	£29.99
Total:	£303.96

ASW 28

The ASW 28 is a 2m span electric glider made from tough EP foam.

The motor is used to climb to altitude and can then be switched off. The propeller folds back and the aircraft then becomes a glider. Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around. This aircraft comes virtually ready built except for installing the receiver and batteries.

It is an easy plane to fly, although ideally with an instructor at first.

ASW 28 PACKAGE DEAL	
ASW 28 electric glider inc motor and controller	£84.99
Saturn 6 ch radio control	£54.99
11.1V 1000 mA lipo battery	£14.99
Charger	£29.99
Total:	£184.96

PARKZONE RADIAN PRO

The Radian Pro is similar to the ASW 28 in that it is a 2m span electric glider made from tough EP foam. The main difference is that the Radian Pro has flaps which can be used to increase lift at low speeds and to slow the model down for landing. The motor is used to climb and is then switched off and the aircraft then becomes a glider. Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around.

It comes virtually ready built and is an easy plane to fly, although ideally with an instructor at first.

PARKZONE RADIAN PRO PACKAGE DEAL	
Parkzone Radian Pro inc servos, battery, charger, motor and controller	£179.99
Spektrum DX6i R/C transmitter	£99.99
Total:	£279.98

ST MODELS BLAZE

The ST Models Blaze is a 1.5m span electric glider made from tough EP foam reinforced with carbon fibre.

The motor is used to climb to altitude and when it is switched off the aircraft then becomes a glider. Running time of the battery is around 10 minutes, but much longer flights can be had if there is good thermal lift around.

This aircraft comes almost ready built. It is a more challenging aircraft to fly and is capable of most aerobatics.

ST MODELS BLAZE PACKAGE DEAL	
ST Models Blaze inc brushless motor and controller	£109.99
Futaba 6J radio control	£134.99
11.1V 2200mA lipo battery	£20.99
Charger	£29.99
Total:	£295.96

PARKZONE SPITFIRE

Parkzone's 1.1m wingspan electric Spitfire is of foam construction and comes ready built. It has a highly detailed and realistic look to it and comes pre painted in authentic RAF colours. An optional E Flite electric retractable undercarriage is available for it.

The Spit's powerful brushless motor and lipo battery help make it a fully aerobatic aircraft.

PARKZONE SPITFIRE MK IX PACKAGE DEAL	
Parkzone Spitfire Mk IX inc servos, battery, charger, motor and controller	£184.99
Spektrum DX6i R/C transmitter	£99.99
Total:	£284.98
Optional electric retractable undercarriage	£51.99

ART-TECH MUSTANG

The Art-Tech Mustang is a scale model of the USAAF's famous fighter aircraft. This model is of moulded foam construction and comes pre built in the box with a complete set of authentic markings. A 4 channel 2.4ghz radio control, Li Po battery and powerful brushless motor are included as standard.

This aircraft is fully aerobatic.

ART TECH MUSTANG PACKAGE DEAL	
Art Tech Mustang inc 4 channel R/C, battery, charger, motor and controller	£149.99
Total:	£149.99

RIPMAX P-38 LIGHTNING

The Ripmax P-38 is a scale model of the USAAF's famous twin boom fighter aircraft. It is of moulded plastic and foam construction and only needs some final assembly and the radio equipment to be installed. Brushless motors and speed controllers are standard.

The P-38 is very powerful and is fully aerobatic.

RIPMAX P-38 PACKAGE DEAL	
Ripmax P-38 inc motors and controller	£104.99
Saturn 6 ch radio control inc 3 micro servos	£69.99
11.1V 2200 mA lipo battery	£19.99
Charger	£29.99
Total:	£224.96
