Helicopters

The helicopters on this leaflet are all have four channel radio controls so they can do anything a real helicopter can do, unlike some toy ones.

The small twin rotor helicopters like the Twisters, the MCX2 and the Razer CX 2.4 make an ideal introduction for the larger outdoor machines as the coaxial rotor layout makes them very stable.

As they are usually flown indoors you are not constrained by light or weather, which means you can get plenty of stick time even during the winter.

Larger single rotor electric helicopters like the Neon Blaze SE, T Rex 450 or Blade 120 SR can be flown in places outdoors or even indoors given enough space. The larger T Rex 500ESP can be flown in windier conditions than the smaller helicopters.

Twister Scale

The Twister Scale is a very small indoor helicopter that includes a 2.4ghz frequency hopping radio control. It includes a USB charge lead and a spare set of blades too. Like the other twin rotor helicopters on this page it requires a living room sized area to fly in. The included lithium polymer battery gives 8-10 minutes flying time.

TWISTER SCALE PACKAGE DEAL

Twister Scale (ARTF) complete inc R/C, batteries and charger	£44.99
Total:	£44.99

Twister Aggressor

The Twister Aggressor is an excellent value indoor helicopter that includes a 2.4ghz frequency hopping radio control. It comes with flight simulator leads to let you practice flying on a PC and a spare set of blades too. Like the other twin rotor helicopters on this page it requires a living room sized area to fly in. The included lithium polymer battery gives 10-15 minutes flying time.

TWISTER AGGRESSOR PACKAGE DEAL

Twister Aggressor (ARTF) complete inc R/C, batteries and charger	£89.99
Total:	£89.99

Twister Medevac

The Twister Medevac is an excellent value indoor helicopter that includes a 2.4ghz frequency hopping radio control. It comes with flight simulator leads to let you practice flying on a PC and a spare set of blades too. Like the other twin rotor helicopters on this page it requires a living room sized area to fly in. The included lithium polymer battery gives 10-15 minutes flying time.

TWISTER MEDEVAC PACKAGE DEAL

Twister Medevac (ARTF) complete inc R/C, batteries and charger	£89.99
Total:	£89.99

E- Flite Blade MCX2

The E-Flite Blade MCX2 is a much smaller helicopter than the Aggressor with a rotor span of only 7.5 inches. It can be flown in a smaller room and if anything is more stable and even easier to fly than the Aggressor. The included lithium polymer battery gives around 8 minutes flying time. We have a Blade MCX2 ready to fly in the shop if you would like to see a demonstration.

E FLITE BLADE MCX2 PACKAGE DEAL

E-Flite Blade MCX2 (ARTF) complete inc R/C, batteries and charger	£89.99
Total:	£89.99

Razer CX 2.4

The Razer CX is a twin rotor helicopter that is a lot bigger than the others shown here. As such it can be flown outdoors on calm days and being twin rotor is easier to fly than the single rotor helicopters but less agile. It features a large number of metal components on the rotor head. It comes with a 2.4ghz frequency hopping radio control and a large capacity lithium polymer battery that gives 10 minutes flying time.

RAZER CX PACKAGE DEAL

Razer CX (ARTF) complete inc R/C and charger	£179.99
Total:	£179.99

E- Flite Blade mCPX

The E-Flite Blade mCPX is a single rotor helicopter similar to the Blade MSR. It is much more aerobatic however. Its more advanced 3 gyro, flybarless control system makes it capable of rolls, loops and other advanced manoeuvres. This is definitely for experienced helicopter flyers only. Two lithium polymer batteries are supplied each of which give around 8 minutes flying time. The MCPX BnF comes without a transmitter, and is for anyone who already has a suitable Spektrum transmitter they can use from another model.

E FLITE BLADE MCPX BnF PACKAGE DEAL

E-Flite Blade MCPX BnF inc batteries and charger	£125.99
Total:	£125.99

E- Flite Blade 120 SR

The E-Flite Blade 120 SR is a single rotor helicopter twice the size of the Blade MSR but much smaller than the larger helicopters below, rotor diameter is 320mm. It is ideal for someone who has mastered a twin rotor helicopter but wants something a little more challenging for indoor use, or for outdoors on a really calm day. The lithium polymer battery supplied gives around 8 minutes flying time. The cheaper Bind n' Fly version comes without a transmitter, and is for anyone who already owns a Spektrum transmitter.

E FLITE BLADE 120 SR BnF PACKAGE DEAL	
E-Flite Blade 120 SR BnF complete inc R/C, batteries and charger (no transmitter)	£101.99
Total:	£101.99

E FLITE BLADE 120 SR PACKAGE DEAL	
E-Flite Blade 120 SR (ARTF) complete inc R/C, batteries and charger	£129.99
Total:	£129.99

Neon Blaze SE

The Neon Blaze SE is an ideal first single rotor electric helicopter that comes ready built and has a rotor diameter of 635mm. It can be flown in calm conditions outdoors, or in a large room indoors. Other features are carbon fibre rotor blades, a 2.4ghz R/C and a lithium polymer battery offering around 10 minutes of running time and an advanced balancer charger.

What sets this helicopter apart from many other similar ones is that it has the latest type of all-metal flybarless rotor head and 3 axis gyro. This makes it nicer to fly, easier to set up and repair.

BLAZE SE SR BnF PACKAGE DEAL	
Blaze SE complete inc R/C, batteries and charger	£219.99
Total:	£219.99

E- Flite Blade 450

The E-Flite Blade 450 is a full sized single rotor helicopter with a rotor diameter of 720mm. Advanced features like CCPM mixing, 2.4 ghz R/C, digital servos, a powerful brushless motor, a heading hold gyro and some CNC machined components allow it to be fully aerobatic in the right hands. It comes ready built and is an excellent outdoor helicopter as it can be flown in windier conditions than the smaller ones. The supplied 11.1V 2200 mah battery gives roughly 10 minutes flight time.

E FLITE BLADE 450 PACKAGE DEAL	
E-Flite Blade 450 complete inc R/C, batteries and charger	£359.99
Total:	£359.99

The T Rex 250 ESP is a small helicopter with a rotor diameter of only 460mm. It is intended for more experienced flyers rather than beginners and comes as a kit to be built. Standard features include a carbon fibre chassis and blades, fibreglass bodywork. Most components on the main rotor and tail rotor assemblies are made from machined metal alloy rather than plastic. This makes the whole thing much stiffer and stronger. As a result this helicopter is highly responsive and ideal for aerobatics, either indoors in a large room or hall or outdoors on fairly calm days.

T Rex 250 ESP

As with all our kit helis, a [free pre flight check](#) is also included in our price deal.

T REX 250 PACKAGE DEAL	
T Rex 250 ESP helicopter kit inc three cyclic servos, carbon blades, brushless motor and controller, gyro and tail servo.	£274.99
Futaba 6EXA 2.4 ghz radio control	£143.50
11.1V 850 mA lipo battery	£17.99
Imax C3 lipo charger	£17.50
Total:	£453.98

The T Rex 450 Sport ESP comes as a kit to be built. and is intended for more experienced flyers rather than beginners. It has a rotor diameter of 715mm. As with all T Rex helicopter kits, it is beautifully engineered. It has a carbon fibre chassis and blades, fibreglass bodywork and many CNC machined alloy components in the main and tail rotor heads. The whole assembly is very stiff and strong which makes it highly responsive and ideal for aerobatics. Being somewhat larger than the T Rex 250 it can cope with windier conditions as well.

T Rex 450 Sport ESP

As for all our kit helis, a [free pre flight check](#) is also included in our price deal.

T REX 450 SPORT ESP PACKAGE DEAL	
T Rex 450 Sport ESP helicopter kit inc three cyclic servos, carbon blades, brushless motor and controller, gyro and tail servo.	£339.99
Futaba 6EXA 2.4 ghz radio control	£143.50
11.1V 2200 mA lipo battery	£19.99
LX 40 balance charger	£29.99
Total:	£533.47

The T Rex 500ESP is a larger helicopter than the others shown here, with a rotor diameter of 970mm and an all up weight of around 1.7kg. It is intended for experienced flyers rather than beginners and comes as a kit to be built. This is a state of the art machine featuring digital servos, an advanced brushless motor and speed controller with regulator. It also has a 6 cell lipo battery, carbon fibre blades and chassis as well as a many CNC machined aluminium parts. It is simply the best helicopter in its class and flies superbly.

T-Rex 500ESP

The charger included in our deal is a top end mains/12V input programmable balancer charger which will charge just about any model battery you might use.

As for all our kit helis, [free pre flight check](#) is also included in our price deal, where we will take the completed helicopter in, make sure the radio control has been fitted correctly and sort out any minor problems for you.

T REX 500 ESP PACKAGE DEAL	
T Rex 500 ESP helicopter kit inc three cyclic servos, carbon blades, brushless motor and controller, gyro and tail servo.	£529.99
Futaba 6EXA 2.4 ghz radio control	£143.50
22.2V 2600 mA lipo battery	£84.99
Sigma II EQ balance charger	£59.99
Total:	£818.47
